

Republic of the Philippines  
SULTAN KUDARAT STATE UNIVERSITY  
ACCESS, EJC Montilla, 9800 City of Tacurong  
Province of Sultan Kudarat

## UNIVERSITY VISION

A leading University in advancing scholarly innovation, multi-cultural convergence, and responsive public service in a borderless Region.

## UNIVERSITY MISSION

The University shall primarily provide advanced instruction and professional training in science and technology, agriculture, fisheries, education and other related fields of study. It shall also undertake research and extension services, and provide progressive leadership in its areas of specialization.

## UNIVERSITY STRATEGIC GOALS

- a. Deliver quality service to stakeholders to address current and future needs in instruction, research, extension, and production
- b. Observe strict implementation of the laws as well as the policies and regulations of the University
- c. Acquire with urgency state-of-the-art resources for its service areas
- d. Bolster the relationship of the University with its local and international customers and partners
- e. Leverage the qualifications and competences in personnel action and staffing
- f. Evaluate the efficiency and responsiveness of the University systems and processes

## PROGRAM OUTCOMES (PO) COMMON TO ALL PROGRAMS AND ITS RELATIONSHIPS TO INSTITUTIONAL OUTCOMES

A graduate of Sultan Kudarat State University can:	INSTITUTIONAL OUTCOMES (IO)						
	a	b	c	d	e	f	g
a. Ability to analyze broadly defined industrial technology processes by using analytical tools that enhances creativity, innovativeness, and intellectual curiosity to improve methods, processes, and systems that meet the industry standards				✓	✓	✓	
b. Ability to design and implement broadly defined industrial systems, components, products or processes to meet specific industry needs with proficiency and flexibility in the area of specialization in accordance with global standards		✓			✓		
c. Ability to apply appropriate techniques, resources, and state-of-the-art industrial technology tools to meet current industry needs and use these modern tools and processes to improve and increase		✓			✓		

d.	Ability to communicate with diverse groups of clientele the appropriate cultural language with clarity and persuasion, in both oral and written forms, including understanding and giving of clear instructions, high comprehension level, effectiveness in delivering presentations and writing documents, and articulating technological innovation outputs	✓						
e.	Ability to develop leadership and management skills in a team-based environment by making informed decisions, keeping the team motivated, acting and delegating responsibility, and inspiring positive changes in the organization by exercising responsibility with integrity and accountability in the practice of one's profession	✓	✓					
f.	Practice the moral responsibilities of an industrial technologist to manage and balance wider public interest and uphold the norms and safety standards of the industrial technology profession	✓						
g.	Ability to demonstrate enthusiasm and passion for continuous personal and professional development in broadly defined industrial technology and effecting positive changes in the entrepreneurial and industrial endeavor	✓						

1 COURSE CODE ET 111  
 2 COURSE TITLE Electricity and Electronics Principles  
 3 PREREQUISITE None  
 4 CREDITS 3 units

### 5 COURSE DESCRIPTION

This course deals with the basics electrical and electronics components and their characteristics, basic electronic circuit, control application including the study of physical, chemical and electrical properties of conductors, semi-conductors and insulators.

### 6 COURSE LEARNING OUTCOMES (CLO) AND ITS RELATIONSHIPS TO PROGRAM OUTCOMES

Course Learning Outcomes (CLO)	Program Outcomes						
	a	b	c	d	e	f	g
At the end of the course, a student can:							
a. Apply the principles of assessment in conceptualizing techniques for assessing authentic learning	✓	✓	✓	✓	✓	✓	✓
b. Design performance-based assessment tools	✓	✓	✓	✓	✓	✓	✓
c. Design assessment tools for effective learning	✓	✓	✓	✓	✓	✓	✓
d. Develop E-Portfolio to assess ones learning	✓	✓	✓	✓	✓	✓	✓
e. Demonstrate skills preparing and reporting grades	✓	✓	✓	✓	✓	✓	✓
f. Derive information from alternative forms of assessments in making instructional decisions	✓	✓	✓	✓	✓	✓	✓

### 7 COURSE CONTENTS

CONTENT	INTENDED LEARNING OUTCOMES (ILOs)	TEACHING AND LEARNING ACTIVITIES (TLA)	OUTCOMES-BASED ASSESSMENT (OBA)	COURSE LEARNING OUTCOMES (CLOs)
1 <b>Course Orientation</b> SKSU VMGO, Classroom Policies, Course Overview, Course Requirements, Grading System	At the end of the week, the pre-service teacher (PST) can: a. discuss the University's VMGO, classroom policies, course overview, requirements and grading system	At the end of the week, the pre-service teacher (PST) can: a. discuss the University's VMGO, classroom policies, scope of the course, course requirements and grading system	Discuss the VMGO of the University, the classroom policies, scope of the course, course requirements and grading system	
2 <b>Basic Electricity</b> a. Electricity fundamentals: definition, importance, and application b. Electric Charge and Current: Types of charges, current flow, and measurement c. Resistance and Conductance: Ohm's Law, resistivity, and conductance d. Circuits and Circuit Elements: Series and parallel circuits, resistors, capacitors, and inductors e. Electric Power and Energy: power calculation, energy consumption, and safety	At the end of the week, the pre-service teacher (PST) can: a. Understand the fundamental concepts of electricity b. Analyze electric circuits and calculate circuit parameters c. Apply Ohm's Law and circuit analysis techniques d. Design and troubleshoot simple electric circuits e. Recognize the importance of electricity	At the end of the week, the pre-service teacher (PST) can: a. Lectures and discussions b. Circuit simulations and modeling c. Hands-on experiments and projects d. Group activities and problem-solving exercises e. Online resources and multimedia materials	a. Quizzes and exams to assess understanding of concepts b. Circuit analysis and design problems c. Lab reports and project evaluations d. Group presentations and peer assessments e. Safety protocols and practices evaluation	a, b, c, and d
3 <b>Conductors and Insulators</b> a. Conductors: Definition, examples, and applications b. Insulators: Definition, examples, and applications c. Properties of conductors and Insulators: conductivity, resistivity, and dielectric strength d. Factors affecting conductivity: temperature,	At the end of the week, the pre-service teacher (PST) can: a. Understand the difference between conductors and insulators b. Identify and explain the properties of conductors and insulators c. Analyze the factors affecting conductivity and insulators in electrical systems d. Recognize the importance of conductors and insulators in electrical safety	At the end of the week, the pre-service teacher (PST) can: a. Lectures and discussions b. Hands-on experiments c. Group activities: identifying conductors and insulators d. Case studies: Application of conductors and insulators e. Simulations: visualizing electric current flow	a. Quizzes and exams: conductors and insulators concepts b. Lab reports: experiments with conductors and insulators c. Group presentations: applications and case studies d. Problem-solving exercises: conductivity and resistivity e. Project evaluation: design and safety consideration	a, b, c, and f

	e. Applications of Conductors and Insulators: Electric wiring, electronics, and safety devices	At the end of the week, the pre-service teacher (PST) should be able to: <ul style="list-style-type: none"> <li>a. Understand the fundamental concepts of semiconductors</li> <li>b. Explain the properties and types of semiconductors</li> <li>c. Analyze the applications of semiconductors in electronics</li> <li>d. Identify and describe various semiconductor devices</li> <li>e. Recognize the importance of semiconductors in modern technology</li> </ul>	<ul style="list-style-type: none"> <li>a. Lectures and discussions</li> <li>b. Diagrams and illustrations of semiconductors</li> <li>c. Hands-on experiments with semiconductors</li> <li>d. Group activities: designing and building simple semiconductor circuits</li> <li>e. Case studies: applications of semiconductors in real-world devices</li> </ul>	<ul style="list-style-type: none"> <li>a. Quizzes and exams: semiconductor concepts and devices</li> <li>b. Lab reports: experiments with semiconductor devices</li> <li>c. Group presentations: applications and case studies</li> <li>d. Project evaluation: design and implementation of semiconductor circuits</li> <li>e. Problem-solving exercises: analyzing semiconductor circuits</li> </ul>	a, b, e, and f
3	<b>Semiconductors</b> <ul style="list-style-type: none"> <li>a. Introduction to Semiconductors: definition, properties, and importance</li> <li>b. Types of Semiconductors: intrinsic and extrinsic semiconductors, p-type and n-type materials</li> <li>c. Semiconductor materials: silicon, germanium, and other semiconductor materials</li> <li>d. Applications of semiconductors: diodes, transistors, integrated circuits, and electronics</li> <li>e. Semiconductor devices: diode, transistor, thyristor, and other devices</li> </ul>	At the end of the week, the pre-service teacher (PST) should be able to: <ul style="list-style-type: none"> <li>a. Understand the fundamental concepts of semiconductors</li> <li>b. Explain the properties and types of semiconductors</li> <li>c. Analyze the applications of semiconductors in electronics</li> <li>d. Identify and describe various semiconductor devices</li> <li>e. Recognize the importance of semiconductors in modern technology</li> </ul>	<ul style="list-style-type: none"> <li>a. Lectures and discussions</li> <li>b. Diagrams and illustrations of semiconductors</li> <li>c. Hands-on experiments with semiconductors</li> <li>d. Group activities: designing and building simple semiconductor circuits</li> <li>e. Case studies: applications of semiconductors in real-world devices</li> </ul>	<ul style="list-style-type: none"> <li>a. Quizzes and exams: semiconductor concepts and devices</li> <li>b. Lab reports: experiments with semiconductor devices</li> <li>c. Group presentations: applications and case studies</li> <li>d. Project evaluation: design and implementation of semiconductor circuits</li> <li>e. Problem-solving exercises: analyzing semiconductor circuits</li> </ul>	a, b, e, and f
4	<b>Transformers</b> <ul style="list-style-type: none"> <li>a. Introduction to Transformers: Definition, principle of operation, and types</li> <li>b. Transformer Construction: Core, windings, and insulation</li> <li>c. Transformer Operation:</li> </ul>	At the end of the week, the pre-service teacher (PST) can: <ul style="list-style-type: none"> <li>a. Understand the fundamental principles of transformers</li> <li>b. Explain the construction and operation of transformers</li> <li>c. Analyze transformer efficiency and losses</li> <li>d. Apply transformer knowledge in power</li> </ul>	<ul style="list-style-type: none"> <li>a. Lectures and discussions</li> <li>b. Diagrams and illustrations of transformer construction and operation</li> <li>c. Hands-on experiments with transformers</li> <li>d. Group activities: Designing and calculating transformer specifications</li> <li>e. Case studies: Applications of transformers in power systems and</li> </ul>	<ul style="list-style-type: none"> <li>a. Quizzes and exams: Transformer concepts and operation</li> <li>b. Lab reports: Experiments with transformers</li> <li>c. Group presentations: Applications and case studies</li> <li>d. Problem-solving exercises:</li> </ul>	a, b, c, e, and f

	c. Capacitor Properties: Capacitance, voltage rating, and dielectric strength d. Capacitor Applications: Filtering, coupling, and energy storage e. Capacitor Types: Ceramic, electrolytic, film, and variable capacitors	c. Analyze capacitor applications in electronic circuits d. Identify and describe various types of capacitors e. Recognize the importance of capacitors in electronic systems	in real-world devices	d. Problem-solving exercises: Capacitor calculations and design e. Project evaluation: Design and implementation of capacitor- based circuits
7	<b>Inductors</b> a. Introduction to Inductors: Definition, principle of operation, and types b. Inductor Construction: Coil, core, and winding configurations c. Inductor Properties: Inductance, current rating, and magnetic field d. Inductor Applications: Filtering, energy storage, and electromagnetic interference (EMI) suppression e. Inductor Types: Air-core, iron-core, ferrite-core, and variable inductors	At the end of the week, the pre-service teacher (PST) can: a. Understand the fundamental principles of inductors b. Explain the construction and properties of inductors c. Analyze inductor applications in electronic circuits d. Identify and describe various types of inductors e. Recognize the importance of inductors in electronic systems	a. Lectures and discussions b. Hands-on experiments with inductors c. Circuit simulations using software tools d. Group activities: Designing and building inductor-based circuits e. Case studies: Applications of inductors in real-world devices	a. Quizzes and exams: Inductor concepts and properties b. Lab reports: Experiments with inductors c. Group presentations: Applications and case studies d. Problem-solving exercises: Inductor calculations and design e. Project evaluation: Design and implementation of inductor- based circuits
8	<b>FINAL EXAMINATION</b>			
<b>Total No. of Hours : 54</b>				

## 8 COURSE REQUIREMENTS AND COURSE POLICIES

Each student is required to:

### COURSE REQUIREMENTS

1. submit accomplished assignments, problem sets and a mini-research project;
2. prepare a comprehensive lecture notebook;
3. make a PowerPoint presentation, and a written summary of the assigned report;

- discuss an assigned topic to report and participate in class discussions; and
- pass the major exams (midterm and final)

## COURSE POLICIES

**Attendance:** A student will be marked late if he/she enters the class 5 minutes after start of class period. Any student who comes to class 15 minutes after the scheduled time or always late for three consecutive meetings shall be marked absent.

**Missed work or exam:** Any student who missed to submit a work assignment or to take a test should consult the concerned instructor for immediate compliance

**Cheating and Plagiarism:** Any student who committed any form of academic dishonesty (e.g., copy-paste plagiarism) shall be given disciplinary action provided in the SKSU Student's Handbook

**Use of Technology:** Cell phones should be turned off while the session is in progress. Using laptops, notebook PCs, smart phones, and tablets shall be allowed only when needed. A scientific calculator (e.g. Casio fx-991ES) shall be utilized in solving.

## 9 GRADING SYSTEM AND RUBRICS FOR GRADING

GRADING SYSTEM	Midterm Grade	Final Term Grade	FINAL GRADE
Written Examination	30%	Written Examination	50%
Course requirement	40%	Course requirement	50%
Attendance	5%	Attendance	TOTAL
Quizzes	15%	Quizzes	100%
Participation	10%	Participation	
<b>TOTAL</b>	<b>100%</b>
